3 说明

BQ7965x-Q1 系列器件可在不到 200µs 的时间内提供 6S 至 12S (BQ79652-Q1)、14S (BQ79654-Q1) 或 16S (BQ79656-Q1) 电池模块的高精度电池电压测量，同时这些器件还支持分流电阻器电流检测测量。借助集成式前端滤波器，可以在电池输入通道上使用简单、低额定电压的差分 RC 滤波器来实施系统。集成式后 ADC 低通滤波器可以执行经过滤波、类似于直流电的电压测量。该系列器件还支持集成电流检测功能，可选择与电池电压测量同步，以更好地计算荷电状态 (SOC)。此器件支持自主内部电池平衡，并通过监测温度来自动暂停和恢复平衡，以免出现过热条件。

(1) **Status:** For more details on status, see our product life cycle.

(2) **Material type:** When designated, preproduction parts are prototypes/experimental devices, and are not yet approved or released for full production. Testing and final process, including without limitation quality assurance, reliability performance testing, and/or process qualification, may not yet be complete, and this item is subject to further changes or possible discontinuation. If available for ordering, purchases will be subject to an additional waiver at checkout, and are intended for early internal evaluation purposes only. These items are sold without warranties of any kind.

(3) **RoHS values:** Yes, No, RoHS Exempt. See the TI RoHS Statement for additional information and value definition.

(4) **Lead finish/Ball material:** Parts may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead finish/Ball material values may wrap to two lines if the finish value exceeds the maximum column width.

(5) **MSL rating/Peak reflow:** The moisture sensitivity level ratings and peak solder (reflow) temperatures. In the event that a part has multiple moisture sensitivity ratings, only the lowest level per JEDEC standards is shown. Refer to the shipping label for the actual reflow temperature that will be used to mount the part to the printed circuit board.

(6) **Part marking:** There may be an additional marking, which relates to the logo, the lot trace code information, or the environmental category of the part.

Multiple part markings will be inside parentheses. Only one part marking contained in parentheses and separated by a "~" will appear on a part. If a line is indented then it is a continuation of the previous line and the two combined represent the entire part marking for that device.
